Jerome M. Sattler, Ph.D.  

Jerome Sattler is a Diplomat in Clinical Psychology of the American Board of Professional Psychology and a Diplomat of the American Board of Professional Neuropsychology. Currently he is Professor Emeritus and an Adjunct Professor of Psychology at San Diego State University. In 1998 he received the Senior Scientist Award from the Division of School Psychology of the American Psychological Association. In 2003, he received an honorary Doctor of Sciences degree from Central Missouri State University. In 2005, he received the Gold Medal Award for Life Achievement in the Application of Psychology from the American Psychological Foundation. In 2006, he received the Distinguished Contribution to Psychology Award from the San Diego Psychological Association and a Distinguished Visiting Professor Award from the Colorado School of Professional Psychology. In 2014, he received a Lifetime Achievement Award from Azusa Pacific University.

Dr. Sattler’s books include *Foundations of Behavioral, Social, and Clinical Assessment of Children,* (Sixth Edition), *Assessment of Children, Cognitive Applications* (Fifth Edition), *Assessment of Children: WISC–IV AND WPPSI–III Supplement* (with Ron Dumont), *Assessment with the WAIS–IV* (with Joseph J. Ryan), and *Clinical and Forensic Interviewing of Children and Families.* The first five editions of *Assessment of Children* have been translated into Spanish. In 2007, a Spanish translation and a Chinese translation (brief edition) of *Assessment of Children, Behavioral, Social, and Clinical Foundation* (Fifth Edition) were published.

He has published over 100 articles in the fields of school and clinical psychology and is a co-author of the *Stanford-Binet Intelligence Scale: Fourth Edition.*

Kirk Jeffrey Stucky, Psy.D. ABPP (Rp, Cn)  

Dr. Stucky is the Director of Rehabilitation Psychology and Neuropsychology at Hurley Medical Center (HMC) in Flint, Michigan. HMC is a level one trauma center, level two pediatric trauma center, and the regional Children’s Hospital. At HMC Dr. Stucky acts a member of the trauma and rehabilitation leadership teams. For the past 20 years he has been directly involved in clinical management and program development for general, brain injury, and pediatric rehabilitation. He is the acting Chairman of the Department of Psychology, a voting member of the Medical Executive Committee, and active member of the hospital’s Ethics, Conduct and Procedures, and Credentials committees. His educational responsibilities include working with medical students and residents and director of the APA accredited fellowship program in rehabilitation psychology.

Shannon L. Dennis, Ph.D.  

Dr. Dennis is a supervising psychologist in the Department of Rehabilitation Psychology and Neuropsychology at Hurley Medical Center (HMC) in Flint, Michigan. At HMC Dr. Dennis acts a member of the trauma, rehabilitation and pediatric teams. Upon completion of postdoctoral fellowship at HMC in 2007, Dr. Dennis joined the faculty and has served as the pediatric Rehabilitation Psychologist/ Neuropsychologist and the primary supervisor for the APA accredited Rehabilitation Psychology pediatric fellowship. Clinical responsibilities include inpatient and outpatient services for children with neurological injuries and illnesses and neurodevelopmental disorders. Her educational responsibilities include working with medical students and pediatric residents, and participating as faculty for the fellowship program in Rehabilitation Psychology and Consortium for Advanced Psychology Training at Michigan State University- College of Human Medicine.
WORKSHOP OVERVIEWS AND OBJECTIVES

Working with Children and Adolescents with Jerome Sattler, Ph.D. -

This workshop will cover the latest developments in the assessment of behavioral, social, and clinical aspects of children’s functioning. It will be based on Dr. Jerome Sattler’s latest book “Foundations of Behavioral, Social, and Clinical Assessment of Children” Sixth Edition. Topics will include bullying, cyberbullying, sports-related concussions, executive functions, LD, ADHD, autism spectrum disorders, other disabilities, functional behavioral assessment, and clinical assessment techniques and instruments. Attention will be given to DSM-5. Each participant will receive a copy of “Foundations of Behavioral, Social, and Clinical Assessment of Children, Sixth Edition” and its accompanying Resource Guide. The Resource Guide contains numerous checklists, forms, and semi-structured interviews related to the assessment of children with special needs and of children who are at risk. The Resource Guide also contains an extensive list of suggestions for parents and teachers for helping children with special needs and for children affected by bullying and cyberbulling.

PLEASE NOTE: Dr. Sattler’s book Foundations of behavioral, Social, and Clinical Assessment of Children (Sixth Edition) will be included with Registration. Books will be available at the Registration Desk on the day of the event.

• Participants will learn about assessment techniques using interviewing, observations, new editions of assessment instruments related to behavioral and personality assessment, and new informal procedures for the assessment of children.
• Participants will learn about the functional behavioral assessment techniques and executive functions measurement techniques.
• Participants will learn about DSM-5 as related to children with special needs.

Essential Role of the Psychologist with Injured Youth: Inpatient through Outpatient -

“Working with adolescents and young adults whom have suffered spinal cord injury or amputation.” These injuries present unique challenges to teens and young adults whom are forming identity and facing the developmental demands of individuation and separation. Psychologist's role in intervening and facilitating success in this life transition will necessitate a variety of assessment and therapeutic concerns. Psychologists have an essential role with the medical team in working with acute, post-acute and long term recovery phases. Emotional, social (including substance abuse), school, vocational as well as family/caregiver issues will be addressed and two case presentations will give practical application of assessments and interventions. – Kirk Stucky, Psy.D.

“Interventions with Adolescents with severe Traumatic Brain Injury”. Will review essential concerns during acute recovery in hospital settings to discharge, post-acute recovery and adjusting returning home, and the challenges of long term recovery that teenagers will face. Psychologist’s role in working with cognitive, psychosocial, school, vocational and family/caregiver issues outlined in a case presentation, as they also work with the medical team both inpatient and outpatient, providing assessment and intervention. – Shannon Dennis, Ph.D.

• Participants will learn about psychological and neuropsychological assessment techniques used in the hospital setting with adolescents and young adults who have sustained a traumatic injury and or polytrauma.
• Participants will learn about psychological and neuropsychological assessment techniques used in the outpatient setting with adolescents and young adults who have sustained a traumatic injury and or polytrauma.
• Participants will learn about disability related issues, the minority model of disability, and why this level of understanding and conceptualization helps inform the psychologist’s application of assessment, treatment, and advocacy competencies.
• Participants will learn about common and unique family, psychosocial, vocational, and school reentry issues (including IEPs) often encountered while providing services for individuals with potentially disabling conditions such as TBI, SCI, and traumatic amputation.
REGISTRATION:

By mail: Please send registration form and either a check payable to “MPA” or credit card information to

MPA
124 W. Allegan, Suite 1900
Lansing, MI 48933
